Counting Flag Football: a data product, end to end

Three goals, five data products: owned, measured, safe for kids.

Why

- G1 Grow the NFL globally
- G2 Grow US flag, safely and cheaply
- G3 Turn families into fans, never by marketing to kids

What

DP1 Intake
Source · MVP · Grade C · G1 · G2

DP2 Participant master
Master · Proposed · 0.4% range · G1 · G2 · G3

DP3 Global view
Insight · Proposed · Grade C · G1

DP4 US growth
Insight · MVP · A to D · G2

DP5 Fan conversion
Insight · Proposed · Grade D · G3

US growth and intake first; conversion waits.

For whom

Growth lead: where to invest

Ops lead: league health

Club manager: grow flag locally

Fan analyst: proof of fans

Privacy lead: kids' data safe

League volunteer: send data, simply *supplier*

How

1	2	3	4	5
Discover	**Plan**	**Build**	**Package**	**Monitor**
6 users	MVP chosen	0 breaks	labels, owners	100% of tests pass

Privacy by design

Under 13	13–15	16–17	18+
Guardian	Guardian	Guardian	Self

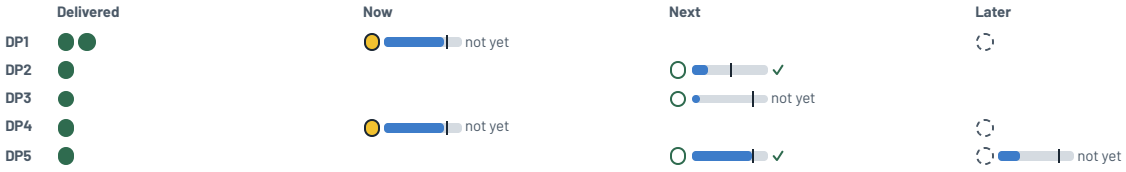

Stricter than the law, by choice.

~~Marketing to minors~~ · ~~Buying kids' data~~ · ~~Fuzzy matching~~ · ~~Scoring families~~ · ~~Records past 18~~

9% of under-13 families agreed to club contact; we count families.

Roadmap

2 of 6 gates met. MVP waits on data score (82→85).

Working?

G1	G2	G3
about 7,400 players, 8 countries	**47%** girls' share	**about 1,300** new fans (900–1,600)
	58% play again	
100% tests pass	**0** boundary breaks	**14 of 76** leagues no file

Learned, next

Pivot Thin data, not consent, was the problem. Intake and quality first.

Debt Second identity chain found; merge planned (DP2 v1.1).

Next Privacy lead approves fan analysis; guardian consent at registration.

Synthetic data, built to test the method. Full detail: Data product tab → Methodology 2.0
