Counting Flag Football: a data product, end to end

Three business goals, turned into five data products that are owned, measured and safe for kids.

1 · WHAT WOULD YOU BUILD FOR THESE GOALS?

Each goal has one product that moves it directly.

Three goals led to five products.

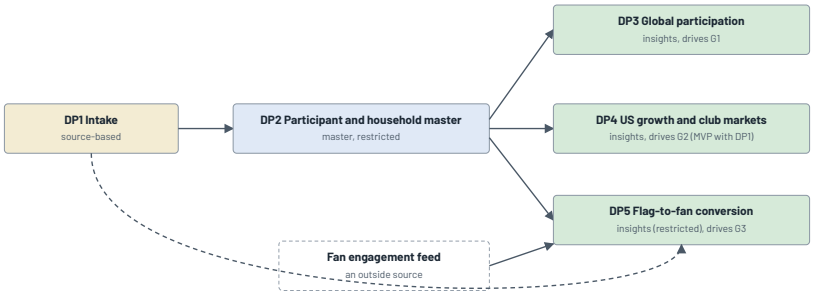

Goal	DP1 Intake	DP2 Master	DP3 Global	DP4 US growth	DP5 Fan conversion
G1 Grow the NFL globally	Utility	Enabler	Driver		
G2 Grow flag in the US	Utility	Enabler		Driver	
G3 Turn families into fans		Enabler			Driver

Driver: moves the goal directly. Enabler: makes other products possible. Utility: keeps things running.

2 · WHAT WOULD YOU BUILD FOR THESE GOALS? (CONTINUED)

Intake feeds the master, and the master feeds the three insight products.

Conversion also needs the fan feed and guardian consent.

consent capture at registration (DP1) is a precondition for DP5

3 · WHO ARE THE PRODUCTS FOR?

Six personas, and what we'd ask them.

There are no real users yet, so these are assumptions to test.

International growth lead

Serves G1

Decide which countries to invest in

We would ask: Which decisions did you make last year without data?

NFL FLAG domestic operations lead

Serves G2

Know where flag is growing and where leagues are struggling

We would ask: Which numbers do you distrust today, and why?

Club youth and community manager

Serves G2, G3

Grow flag in our market and connect families to the club

We would ask: What would you do differently with a market view?

Fan and club marketing analyst

Serves G3

Show that flag creates fans, and reach families who agreed to be reached

We would ask: What evidence would convince finance that flag drives fandom?

Privacy and compliance lead

Serves G3 (guardrail)

Make sure children's data is never misused

We would ask: What would make you comfortable approving club access?

League operator (volunteer)

Serves G2 (supplier)

Run the league and send the data that is asked for

We would ask: What is the most you would fill in at registration?

4 · WHAT DO WE BUILD FIRST, AND WHY?

Intake and US growth first. Conversion waits: high value, data not ready.

Each product is scored on value, feasibility, readiness and privacy risk.

Product	Value	Feasibility	Readiness	Privacy risk	Total	Reading
DP1 Intake	4	5	3	1	**11**	Build first
DP4 US growth	5	4	3	2	**10**	Build first
DP2 Master	4	4	4	4	**8**	Next
DP3 Global	4	3	2	2	**7**	High value, low readiness: sequenced, not deprioritized
DP5 Fan conversion	5	2	1	5	**3**	High value, low readiness: sequenced, not deprioritized

Scores 1 to 5. Total = value + feasibility + readiness - privacy risk.

5 · WHAT HAS TO BE TRUE BEFORE EACH PRODUCT MOVES FORWARD?

2 of 6 release gates met. The MVP waits on the US data score (82 → 85).

No dates: a product moves when its gate is met and the right person signs off.

	DELIVERED	NOW	NEXT	LATER
SOURCE-BASED **DP1 League Registration Intake** Grow NFL presence globally, Grow flag in the US	**Raw + staging and quality profile** v0.1 · Phase 1 **Contracts + onboarding playbook** v0.5 · Phase 4	**Data standard, league fix lists (by records affected), quality port** v1.0 ○ **Not yet** now 82.1 points, needs 85 points or more		**"Played youth flag?" question at adult sign-up** v1.2
MASTER **DP2 Flag Participant & Household Master** Grow NFL presence globally, Grow flag in the US, Track conversion to fans, protecting children	**Identity resolution + review queue** v1.0 · Phase 2		**Restricted zones; consumers use product ports only. One identity chain: merge the Phase 5 feeds into Phase 2 resolution (known debt)** v1.1 **Met** ✓ now 0.43%, limit 1%	
INSIGHTS **DP3 Global Participation Insights** Grow NFL presence globally	**Counting method, scorecard, ranges** v0.9 · Phases 3 + 5		**Country view for growth decisions** v1.0 ○ **Not yet** now 1, needs 6 or more countries	
INSIGHTS **DP4 US Flag Growth & Club Market Insights** Grow flag in the US	**What we learned.** We learned the real pain point was thin, poor-quality data, not consent to contact. Intake and data quality moved first. **Retention + club market prototype** v0.5 · Phases 4 + 5	**MVP: market view for clubs and the fix ranking by participants** v1.0 ○ **Not yet** now 82.1 points, needs 85 points or more ◆ **Privacy lead:** Signs off the club share		**Girls' share by market** v1.1 ◆ **Clubs:** Confirm market boundaries (ADR-016 approximation)
INSIGHTS, RESTRICTED **DP5 Flag-to-Fan Conversion Insights** Track conversion to fans, protecting children	**Fan-lift analysis prototype (restricted zone)** v0.1 · Phase 4		**Fans created by flag (aggregates only)** v0.5 **Met** ✓ now 80.2%, needs 80% or more ◆ **Privacy lead:** Approves the analytics linkage (ADR-009)	**Families clubs may contact** v1.0 ○ **Not yet** now 28.5%, needs 75% or more ◆ **Product + legal:** Add a separate guardian club-contact consent at registration

NOT DOING ~~marketing to anyone under 18~~ · ~~fuzzy matching of families to fan accounts~~ · ~~buying outside data about kids~~ · ~~scoring the value of flag families~~ · ~~carrying a youth record past 18~~

No dates: products move when their data is good enough and the right person has signed off. Bars show where a gate stands; the tick is the target. ◆ marks a decision. Targets are set for a synthetic dataset.

6 · HOW DO WE PROTECT KIDS?

Minors are guardian-only. We count families, never kids.

9% of families with a child under 13 agreed to club contact.

Under 13	13–15	16–17	18+
Guardian	Guardian	Guardian	Self, fresh consent

⊘ ~~Marketing to under-18s~~ · ⊘ ~~Buying data about kids~~ · ⊘ ~~Fuzzy family matching~~ · ⊘ ~~Scoring families~~ · ⊘ ~~Youth records past 18~~

7 · IS IT WORKING?

Fans created by flag: about 1,300 (900–1,600).

Three goal numbers, then the health of the data behind them.

G1
7,400
players in 8 countries

G2
47%
girls · 58% play again

G3
1,300
new fans (900–1,600)

100% tests pass **0** boundary breaks **14 of 76** leagues sent no file 2025, synthetic

8 · WHAT DID WE LEARN, AND WHAT'S NEXT?

We started with consent. The real problem was thin, messy data.

PIVOT	We started with consent to contact. The real problem was thin, messy data, so intake and quality went first.
KNOWN DEBT	Found a second identity chain; merge planned (DP2 v1.1).
NEXT DECISION	Privacy lead approves the fan analysis; add guardian consent at sign-up.

All figures synthetic, built to test the method Full detail: Data product tab → Methodology 2.0
