Counting Flag Football: a data product, end to end

Five data products: owned, measured, safe for kids.

Why

- G1 Grow the NFL globally
- G2 Grow flag in the US as a safe, low-cost way into football
- G3 Turn families into fans, never by marketing to kids

What

DP1	**Intake**	Source	MVP	Grade C	G1	G2
DP2	**Participant master**	Master	Proposed	0.4% range	G1	G2	G3
DP3	**Global view**	Insight	Proposed	Grade C	G1	
DP4	**US growth**	Insight	MVP	A to D	G2	
DP5	**Fan conversion**	Insight	Proposed	Grade D	G3	

US growth and intake first; conversion waits.

For whom

- **Growth lead:** where to invest
- **Ops lead:** league health
- **Club manager:** grow flag locally
- **Fan analyst:** proof of fans
- **Privacy lead:** kids' data safe
- **League volunteer:** send data, simply *supplier*

How

1	2	3	4	5
Discover	**Plan**	**Build**	**Package**	**Monitor**
6 users	MVP chosen	0 breaks	labels, owners	Health and goals tracked

Privacy by design

Under 13	13–15	16–17	18+
Guardian	Guardian	Guardian	Self

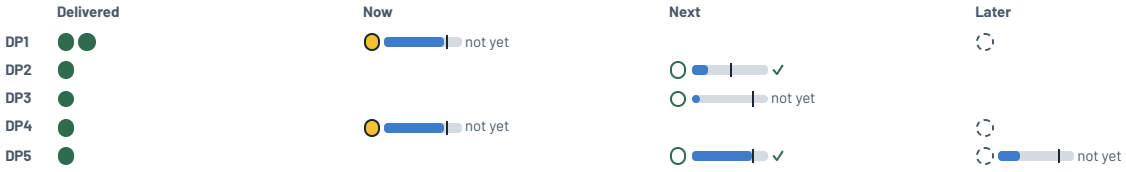

Stricter than the law, by choice.

~~Marketing to minors~~ ~~Buying kids' data~~ ~~Fuzzy matching~~ ~~Scoring families~~ ~~Old records~~

9% of families with a child under 13 agreed to club contact. We count families, never kids.

Roadmap

2 of 6 gates met; MVP waits on score (82→85).

Working?

G1	G2	G3
about 7,400 players, 8 countries	**47%** girls' share	**about 1,300** new fans (900–1,600)
	58% play again	
100% tests pass	**0** boundary breaks	**14 of 76** leagues no file

Learned, next

Pivot Thin data, not consent, was the problem. Intake and quality first.

Debt Second identity chain found; merge planned (DP2 v1.1).

Next Privacy lead approves fan analysis; guardian consent at registration.

Synthetic data, built to test. Full tab → Methodology 2.0
